

# STEP-BY-STEP PROCESS IN MAKING A WEBSITE

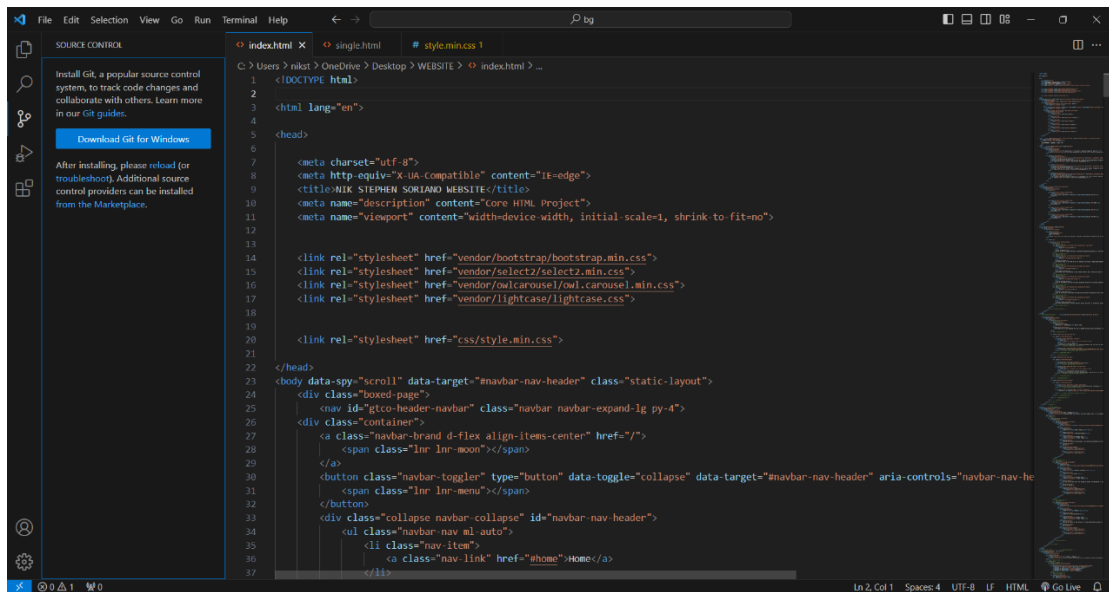

- AFTER DOWNLOADING A VISUAL STUDIO CODE OPEN A NEW FILE

- ADD A NEW FOLDER WHERE WE USE IT AS A FILE IN HTML AND CSS

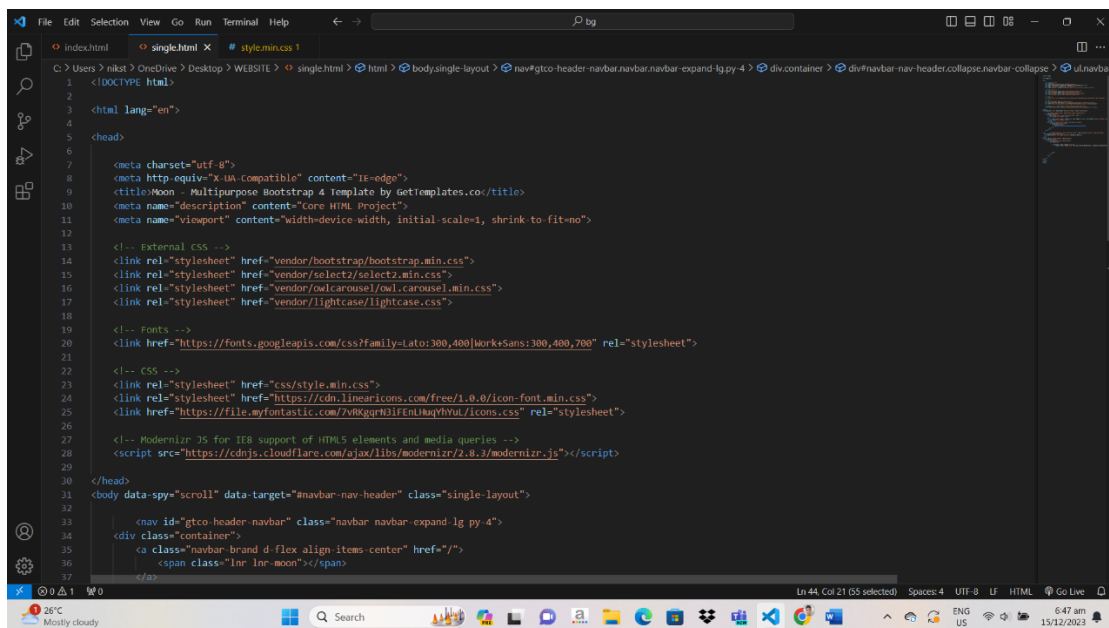

- **LAYOUT YOUR WEBSITE THAT YOU WANT TO DO**

The screenshot shows the VS Code editor with the 'index.html' file open. The code is a Bootstrap 4 layout for a website. It includes a header with a navigation bar, a main content area, and a footer. The navigation bar is a dark blue bar with a white logo and a list of links. The main content area is a light blue box with a white background. The footer is a dark blue bar with white text. The code is as follows:

```
1 <!DOCTYPE html>
2
3 <html lang="en">
4
5 <head>
6
7   <meta charset="utf-8">
8   <meta http-equiv="X-UA-Compatible" content="IE=edge">
9   <title>NIK STEPHEN SORIANO WEBSITE</title>
10  <meta name="description" content="Core HTML Project">
11  <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no">
12
13  <!-- External CSS -->
14  <link rel="stylesheet" href="vendor/bootstrap/bootstrap.min.css">
15  <link rel="stylesheet" href="vendor/select2/select2.min.css">
16  <link rel="stylesheet" href="vendor/owlcarousel/owl.carousel.min.css">
17  <link rel="stylesheet" href="vendor/lightcase/lightcase.css">
18
19  <!-- Fonts -->
20  <link href="https://fonts.googleapis.com/css?family=Lato:300,400|Work+Sans:300,400,700" rel="stylesheet">
21
22  <!-- CSS -->
23  <link rel="stylesheet" href="css/style.min.css">
24
25 </head>
26
27 <body data-spy="scroll" data-target="#navbar-nav-header" class="static-layout">
28
29   <div class="boxed-page">
30     <div id="gtco-header-navbar" class="navbar navbar-expand-lg py-4">
31       <div class="container">
32         <a class="navbar-brand d-flex align-items-center href="/">
33           <span class="lnr lnr-moon"></span>
34         </a>
35         <button class="navbar-toggler" type="button" data-toggle="collapse" data-target="#navbar-nav-header" aria-controls="navbar-nav-header">
36           <span class="lnr lnr-menu"></span>
37         </button>
38         <div class="collapse navbar-collapse" id="navbar-nav-header">
39           <ul class="navbar-nav ml-auto">
40             <li class="nav-item">
41               <a class="nav-link" href="#home">HOME</a>
42             </li>
43           </ul>
44         </div>
45       </div>
46     </div>
47   </div>
```

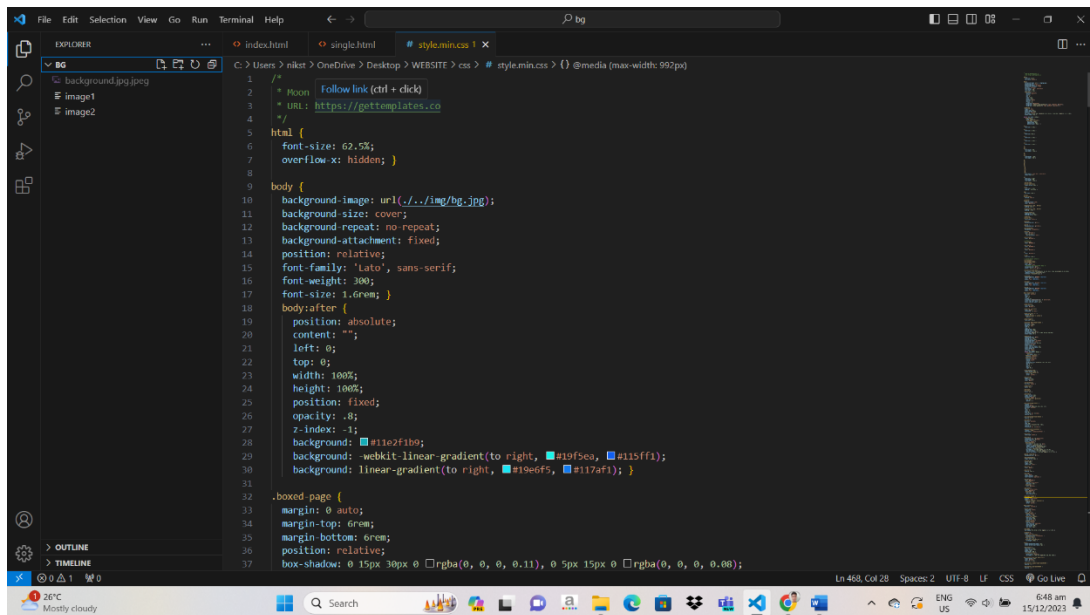

- **ADD ANOTHER FILE FOR ANOTHER LAYOUT (IF YOU JUST WANT)**

The screenshot shows the VS Code editor with the 'single.html' file open. The code is a Bootstrap 4 layout for a website. It includes a header with a navigation bar, a main content area, and a footer. The navigation bar is a dark blue bar with a white logo and a list of links. The main content area is a light blue box with a white background. The footer is a dark blue bar with white text. The code is as follows:

```
1 <!DOCTYPE html>
2
3 <html lang="en">
4
5 <head>
6
7   <meta charset="utf-8">
8   <meta http-equiv="X-UA-Compatible" content="IE=edge">
9   <title>Moon Multipurpose Bootstrap 4 template by GetTemplates.co</title>
10  <meta name="description" content="Core HTML Project">
11  <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no">
12
13  <!-- External CSS -->
14  <link rel="stylesheet" href="vendor/bootstrap/bootstrap.min.css">
15  <link rel="stylesheet" href="vendor/select2/select2.min.css">
16  <link rel="stylesheet" href="vendor/owlcarousel/owl.carousel.min.css">
17  <link rel="stylesheet" href="vendor/lightcase/lightcase.css">
18
19  <!-- Fonts -->
20  <link href="https://fonts.googleapis.com/css?family=Lato:300,400|Work+Sans:300,400,700" rel="stylesheet">
21
22  <!-- CSS -->
23  <link rel="stylesheet" href="css/style.min.css">
24  <link rel="stylesheet" href="https://cdn.linearicons.com/free/1.0.0/icon-font.min.css">
25  <link href="https://file.myfontastic.com/7v8KqqrN3jFENtUqVhVul/icons.css" rel="stylesheet">
26
27  <!-- Modernizr JS for IE8 support of HTML5 elements and media queries -->
28  <script src="https://cdnjs.cloudflare.com/ajax/libs/modernizr/2.8.3/modernizr.js"></script>
29
30 </head>
31
32 <body data-spy="scroll" data-target="#navbar-nav-header" class="single-layout">
33
34   <div id="gtco-header-navbar" class="navbar navbar-expand-lg py-4">
35     <div class="container">
36       <a class="navbar-brand d-flex align-items-center href="/">
37         <span class="lnr lnr-moon"></span>
38       </a>
39     </div>
40   </div>
```

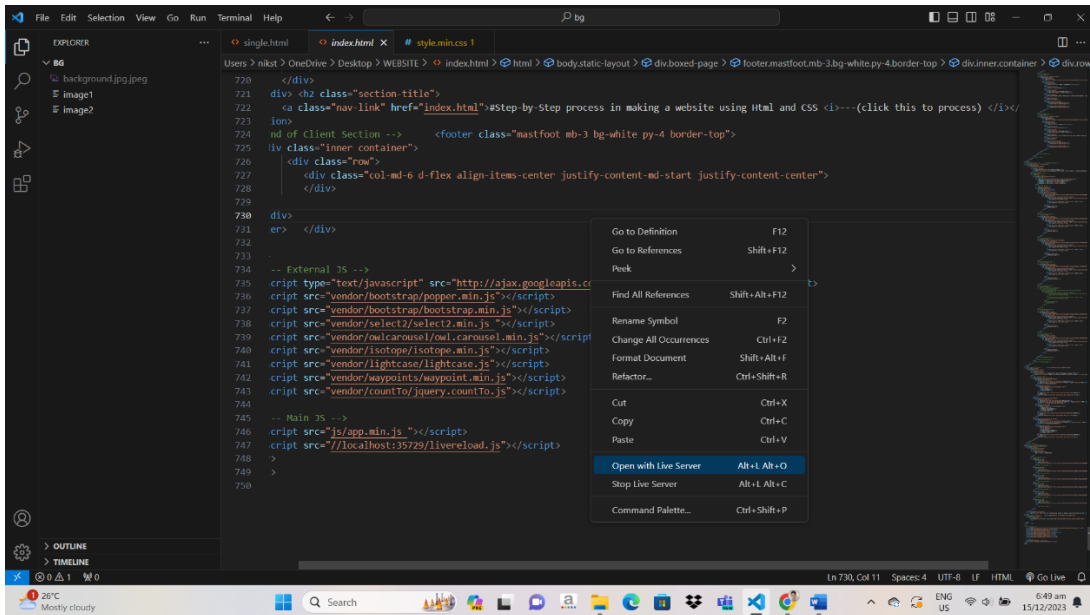

- **ADD ANOTHER FILE FOR THE DESIGNING THE LAYOUT USING CSS**

The screenshot shows the Visual Studio Code editor with the `style.min.css` file open. The Explorer sidebar on the left shows a project structure with `bg`, `image1`, and `image2` files. The main editor area contains the following CSS code:

```
1 /*  
2 * Moon Follow link (ctrl + click)  
3 * URL: https://gettemplates.co  
4 */  
5  
6 html {  
7   font-size: 62.5%;  
8   overflow-x: hidden; }  
9  
10 body {  
11   background-image: url(../img/bg.jpg);  
12   background-size: cover;  
13   background-repeat: no-repeat;  
14   background-attachment: fixed;  
15   position: relative;  
16   font-family: 'Lato', sans-serif;  
17   font-weight: 300;  
18   font-size: 1.6rem; }  
19  
20 body::after {  
21   position: absolute;  
22   content: "";  
23   left: 0;  
24   top: 0;  
25   width: 100%;  
26   height: 100%;  
27   position: fixed;  
28   opacity: .8;  
29   z-index: -1;  
30   background: linear-gradient(to right, #19f5e0, #e115f1);  
31   background: linear-gradient(to right, #19e6f5, #e117a1); }  
32  
33 .boxed-page {  
34   margin: 0 auto;  
35   margin-top: 60px;  
36   margin-bottom: 60px;  
37   position: relative;  
38   box-shadow: 0 15px 30px 0 rgba(0, 0, 0, 0.11), 0 5px 15px 0 rgba(0, 0, 0, 0.08);  
39 }  
40
```

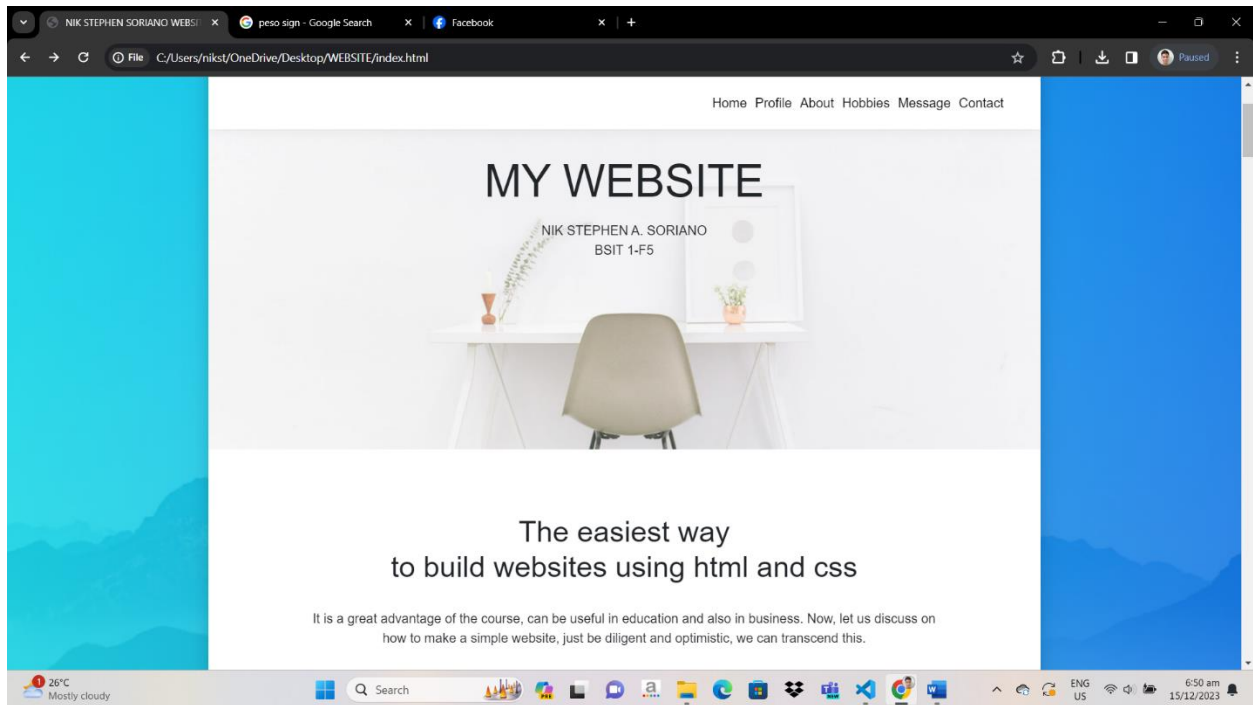

- **RUN YOUR WEBSITE USING OPEN LIVE SERVER**

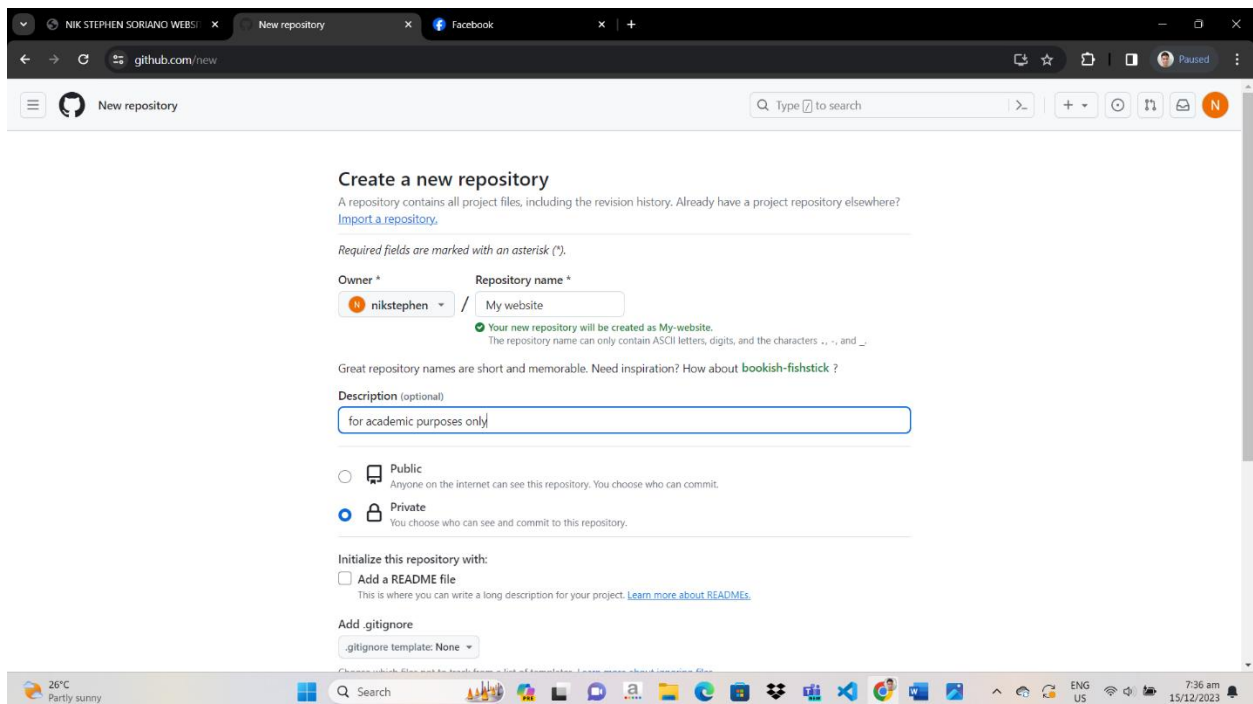

The screenshot shows the Visual Studio Code editor with the `index.html` file open. The Explorer sidebar on the left shows a project structure with `bg`, `image1`, and `image2` files. The main editor area contains the following HTML code:

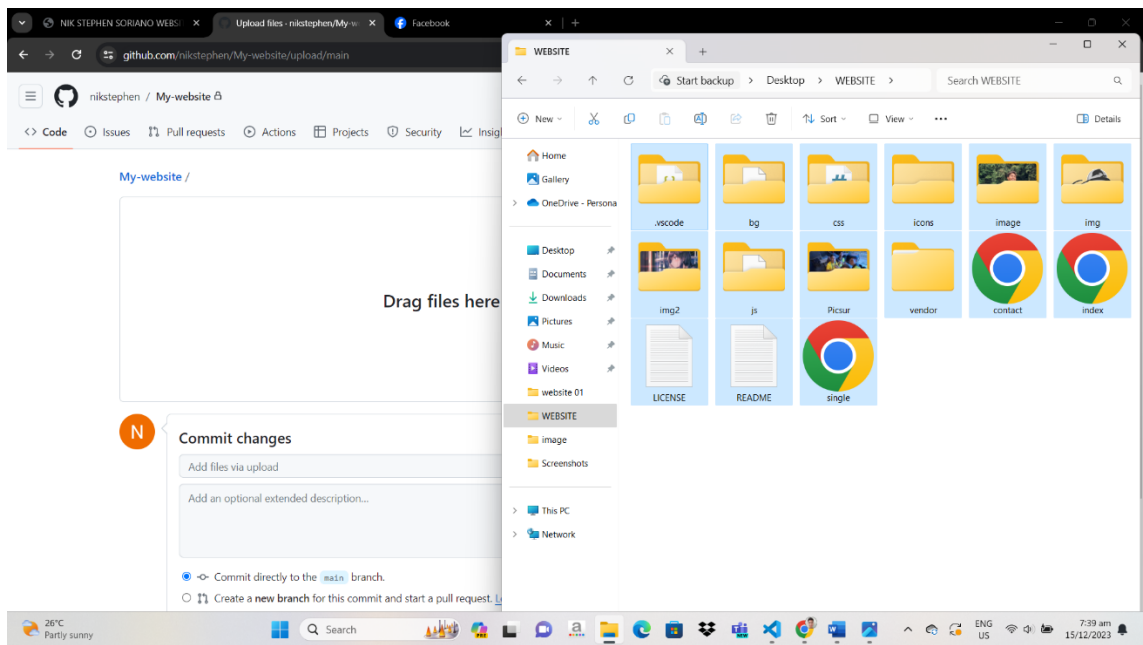

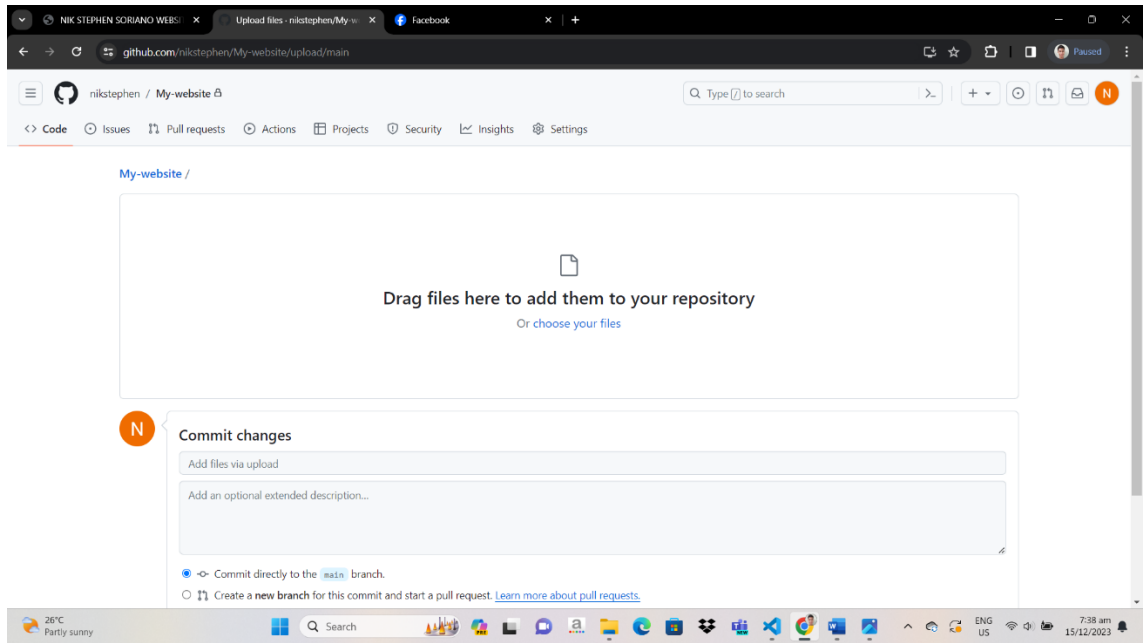

```
720 </div>  
721 <div class="section-title">  
722 <a class="nav-link" href="index.html">Step by Step process in making a website using HTML and CSS <i>---(click this to process)</i></a>  
723 </div>  
724 <div class="inner container">  
725 <div class="row">  
726 <div class="col-md-6 d-flex align-items-center justify-content-md-start justify-content-center">  
727 </div>  
728 </div>  
729  
730 <div>  
731 </div>  
732  
733  
734  
735 <!-- External JS -->  
736 <script type="text/javascript" src="http://ajax.googleapis.com/ajax/libs/jquery/1.12.4/jquery.min.js"></script>  
737 <script src="vendor/bootstrap/popper.min.js"></script>  
738 <script src="vendor/bootstrap/bootstrap.min.js"></script>  
739 <script src="vendor/select2/select2.min.js"></script>  
740 <script src="vendor/owlcarousel/owl.carousel.min.js"></script>  
741 <script src="vendor/isotope/isotope.min.js"></script>  
742 <script src="vendor/lightcase/lightcase.js"></script>  
743 <script src="vendor/maypoints/maypoint.min.js"></script>  
744 <script src="vendor/countTo/jquery.countTo.js"></script>  
745  
746 <!-- Main JS -->  
747 <script src="js/app.min.js"></script>  
748 <script src="//localhost:35729/livereload.js"></script>  
749 </script>  
750 </div>
```

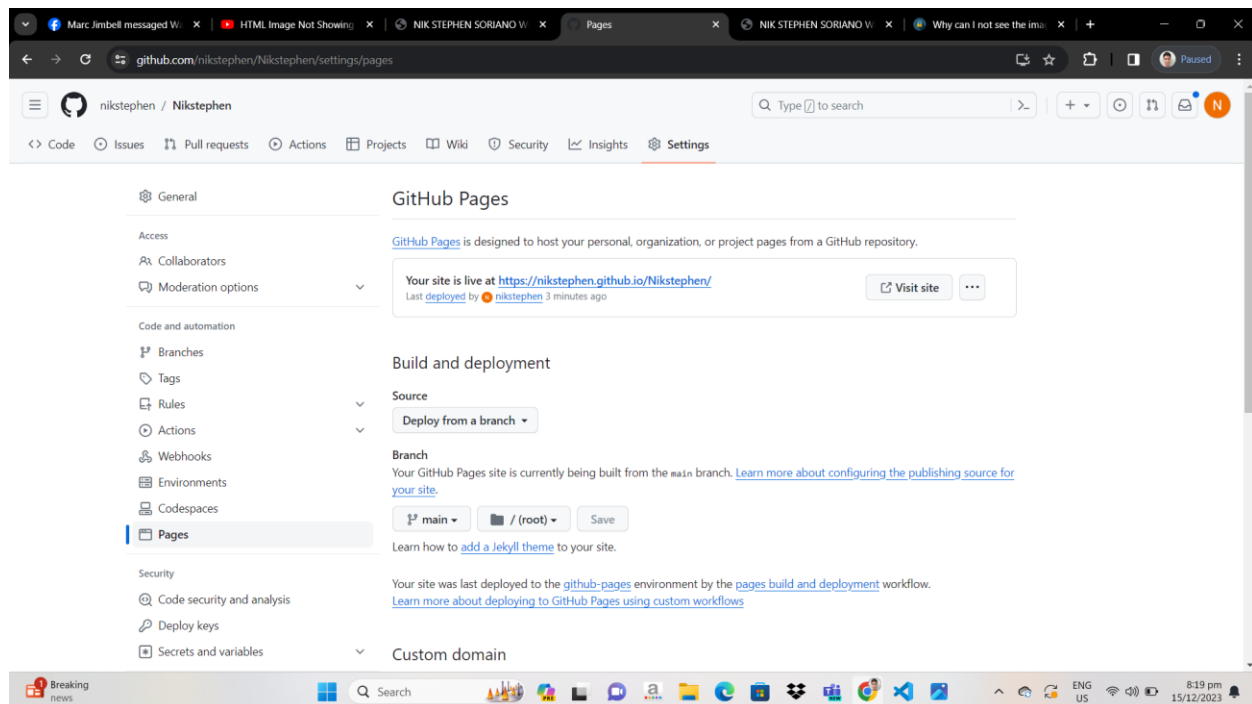

A context menu is open over the `index.html` file, showing various actions. The `Open with Live Server` option is highlighted, with the keyboard shortcut `Alt+L Alt+O`.

- **LAST, PUBLISH IT IN GITHUB**

**THE LINK FOR THE WEBSITE IS:**
